***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-33, drawn to a modular display system, classified in class 40, subclass 605.
  - II. Claims 48-64, drawn to an online drawing program, classified in class 345, subclass 428.
  - III. Claims 38-40, drawn to a sticker, classified in class D19, subclass 1.
  - IV. Claims 41 and 42, drawn to a knock out piece, classified in class 206, subclass 527.
  - V. Claims 34-37, drawn to a notepad, classified in class D19, subclass 1.
  - VI. Claims 43-47, drawn to a trading card, classified in class 283, subclass 75.

Inventions I-VI are directed to related products. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have a materially different mode of operation as invention I describes construction of a modular display piece that can interlock; invention II describes a system for enabling users to create electronic drawings on a remote server; invention III describes construction of a removable sticker assembly; invention IV describes the construction of a removable article from containment packaging; invention

Art Unit: 3714

V describes the construction of a stack of articles connected on an edge to create a pad; invention VI describes the construction of an article that can interlock with other similar articles that carries imagery of celebrities. Each of these features is unique to each invention and not shared by the others. Furthermore, the inventions as claimed do not encompass overlapping subject matter and are not shown to be obvious variants.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

2. Should applicant elect the invention of Group I, an election as to one of the following patentably distinct species is required:

- a. a modular display system for marking upon,
- b. a modular electronic display,
- c. a virtual modular display system,
- d. a sticker, or
- e. a bundling packaging method.

The species are independent or distinct because they are directed to different embodiments of an interconnectable article.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 3714

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David W. Duffy whose telephone number is (571) 272-1574. The examiner can normally be reached on M-F 0830-1700.
